

Linear transfer system RFA075

– The flexible transport system

- Flexible arrangement of the workpiece carriers in 20mm grid
- Maintenance-free transport system
- Stable base frame
- For medium switching times or continuous operation
- Positioning accuracy from ± 0.4
- Drive via disc cam gear or servo motor
- Flexibly programmable
- Short delivery times
- Variable center distance
- Space-saving design due to linear arrangement

Linear transfer system RFA075

– The flexible transport system

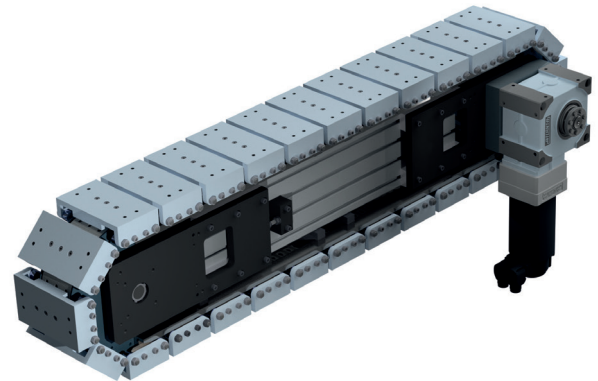

* Dimensions depending on the drive used

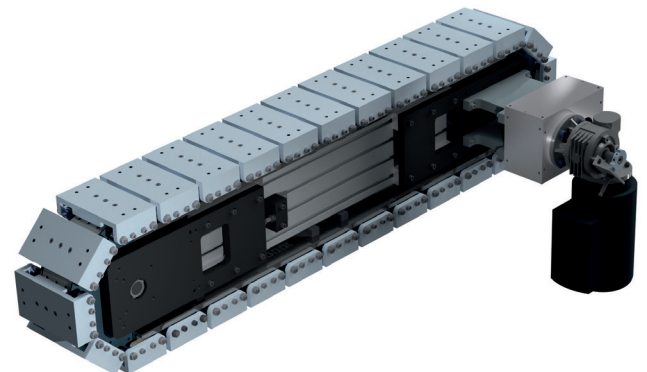

Linear transfer system RFA075

– The flexible transport system

- Servo drive for flexible cycling or continuous operation

- Disc cam gear for precise clocking of the workpiece

- Disc cam transmission with belt drive for achieving special feed rates
